

Absurdus, Pure Pleasure

Now beware 'cos we're all going to die
Explosion and flames thousand miles high
Don't you know there's no mercy for you
Our fate lies in the Big Bang Doom

It will rip your heart out of your chest
It will leave you lying cold on your bed
It's gonna tear your life apart
It will eat your heart...bloody and raw

Come down to see how Thy Kingdom will burn
Step on the line and wait for your turn
Take a look we're going to fall
No sign of your "salvation" at all

[chorus]

We all know it's gonna be pure hell
But there won't be no-one left to tell
You will enjoy your pain and so will I
When all life leaves our beautiful mankind

[chorus]
