

Ace Enders, The Only Thing I Have (The Sign)

It must have been a dream I had, when I was young
Will someone tell me I can be something, for too long
Now I open up my eyes
To see the other side
I'm looking in the mirror at
The man who told me i wasn't right
The only thing i have left by my side
Is a lonely will to fight
When you're lost look for the sign
It says have a look and there you will find
When you're lost look for the sign
But where have you gone
It must have been a dream I had, so long ago
Well something bigger must have touched me then, to fill my mind with hope
Now I'm breathing heavier
I wait my place in line
I'm only choking taking bottles
Down to ease my mind
The only thing i have left by my side
Is a lonely will to fight
When you're lost look for the sign
It says have a look and there you will find
When you're lost look for the sign
But where have you gone

When you're lost look for the sign
It says have a look and there you will find
When you're lost look for the sign
But where have you gone
All alone
And you don't know where to go
All alone
And you don't know where you are
All gone
Find what your looking for
Oh you're gone
Find what you're looking for
The only thing i have left by my side
Is a lonely will to fight
When you're lost look for the sign
It says have a look and there you will find
When you're lost look for the sign
But where have you gone
When you're lost look for the sign
It says have a look and there you will find
When you're lost look for the sign
But where have you gone
It must have been a dream I had, when I was young
