

# Acheode, Let's Cry

Sunrise is coming, night is off  
I work enough but I will work on  
Until I live the sun is the moon  
I prefer the night than the fuckin' noon  
On the skyscraper I can see you all  
I think about you and about your world  
Discovering that there aren't choices  
Listen to me fools not the other voices

I can see your faces from the sky  
And I ask myself is it life?  
What does your god say to you?  
I help you sons, I will always love you  
Madness and sadness are your food  
Without brain only empty skulls  
Look at the life with your fucked eyes  
They can't smile they can only cry

Let's cry my friend let's cry  
There's no much time to live and die let's cry  
How can you lie to death?  
I say you that we can only cry and die, So

Let us cry before we die!

Before we die there's a lot of time  
spent looking the others life  
It's too simple to live and die  
There are troubles it's not too fine  
Life is a war, life is full of shame  
For the people that makes it fake  
Live it with your own fucked force  
Opening the doors that look too close!

Let's cry my friend let's cry  
There's no much time to live and die let's cry  
How can you lie to death?  
I say you that we can only cry and die, So

Let's cry my friend let's cry  
There's no much time to live and die let's cry  
How can you lie to death?  
I say you that we can only cry and die, So

Let us cry before we die!

Let's cry my friend let's cry  
There's no much time to live and die let's cry  
How can you lie to death?  
I say you that we can only cry and die, So

Let's cry my friend let's cry  
There's no much time to live and die let's cry  
How can you lie to death?  
I say you that we can only cry and die, So

Let us cry now!
