Adagio, The Astral Pathway

Day after day
Night after night
Creeping the smiles in the mirror
Obsessed by light
I'm in disguise
No more behaviour
Glittering stars
High in the sky
A million lights shining through
Misunderstood a last goodbye
Picturing the past
Touching the clouds in heaven

Passing the season

Crossing the astral pathway

Blessing the night

And if the stars accept us

I'll be one of them

Day is crying in the sky Wash away my sinful eyes

Stand with me i will carry out your sorrow Stand with me I will make your way through

Shadow

Don't ask me why

Never return

Centuries have past

Dying of dawn

Our mysteries rise from above I'm one of them, i am their king...

Touching the clouds in heaven

Passing the season

Crossing the astral pathway

Blessing the night

And if the stars accept us

I'll be one of them

Day is crying in the sky

Wash away my sinful eyes
