

# Adam Ant, Family Of Noise

a lot of people in this great big-world  
say "love everybody"  
a lot of people busy busy busy busy  
being very modern  
chorus:  
but the family of noise is here  
and it's come to save everybody  
the family of noise is here  
and it's come to save you and me  
it goes:  
the family of noise is here  
and it's come to save everybody  
the family of noise is here  
and it's come to save you and me  
a lot of people in the ancient world  
they loved only quiet  
and then along came the machine  
and a new direction  
the family of noise is here  
and it's come to save everybody  
the family of noise is here  
and it's come to save you and me  
it goes:  
in the morning  
last thing at night  
in the darkness  
standing in the light  
a lot of people in this great big world  
just searching for the "pure" sound  
they're just looking to the machine  
they don't listen to the noise  
the family of noise is here  
and it's come to save you and me
