

Adam & The Ants, Little Devil

You want the world and you want it now
I've got the nerve baby show me how
Fast leather with a good idea
High on the hop so kick it over here
You swallow up a story like a cat drinks milk
Still believe in lingerie white silk
Your a little devil with your hold in tact
What will it take to get you back jack
It's gonna take time, all you really need is time,
Let's get together, and fry, not naughty, but nice, it's not wrong it's right
All you really need is time, let's get together, and fry, not naughty, but nice
You little devil

Variety leaves me so amazed
Dangerous liaison in the home of the crazed
How can you see our love is complete
When you melt me down with your body heat
Sitting in the saddle only to complain
No time for talking baby anyway
Things you do you know I like
You gonna crawl baby d. all night ? ? ?
It's gonna take time, all you really need is time,
It's gonna take time, all you really need is time,
Let's get together, and fry, not naughty, but nice, it's not wrong it's right
All you really need is time, let's get together, and fry, not naughty, but nice
You little devil
