

Adelphi, Too Far From Home

It's building up, it's lights that bring me down
My body's stuck, it's all in my head now
If we fuck up we promise that we'll carry on
No one cares and soon much fun so fast its gone
Nothing's too far from home
We won't change but we'll still grow
Nothing's too far from home
We'll travel far, but we'll find our way back home
No one knows for us it's what we're all about
Expecting sound when you look out to the crowd
Finding out for ourselves the pain of away
To get us where we are today
Nothing's too far from home
We won't change but we'll still grow
Nothing's too far from home
We'll travel far, but we'll find our way back home
We'll find our way back home again
We'll find our way back to our friends
We'll find our way back home again
We'll find our way the end
Nothing's too far from home
We won't change but we'll still grow
Nothing's too far from home
We'll travel far but we'll find our way back home
