

Adem, Launch Yourself

I've been
Trying
Fixing the problem

You pressed
The button
To launch yourself
While I was outside

I heard a spark ignite
I saw a ball of light
I watched you lifting off
There could be no mistake
My hope and faith misplaced
I saw you lifting off

You pressed
The button
To launch yourself
While I was outside
You left me stranded
While you broke through
The atmosphere

I guess you thought you'd start
A new clean sheet and heart
From when you lifted off
I watched you disappear
A ringing in my ear
From when you lifted off

You pressed
The button
To launch yourself
While I was outside
You left me stranded
While you broke through
To other worlds

You left
Me stranded
While you broke through
To other worlds

You pressed
The button
To launch yourself
While I was outside
You left
Me stranded
You launched yourself
While I was outside

You pressed
The button
To launch yourself
While I was outside
You left
Me stranded
You launched yourself
While I was outside
