

# Adolescents, Amoeba

We are the scientists in the lab  
Looking through a microscope  
Those little glass slides they never lie  
How can this small mind cope?  
I've never seen anything like it before  
This amoeba's got a mind of it's own  
But don't turn your back you stupid science world  
This is reaching for the telephone  
A one celled creature a one celled thing  
It hardly knows it's alive  
You're better off dead if you only knew  
Your growing life is taking a dive  
I've never seen anything like it before  
This amoeba's got a mind of it's own  
But don't turn your back you stupid science world  
This is reaching for the telephone
