

Aesop Rock, Lobar

'This is labor labor labor labor
(DJ scratch)

Who put the monkey wrench in well oiled perfectionist emblem
Just to watch these monitors spit white noise
through your office space auto made
I infect knowledge gene pool dissented cloud clusters
Brushing dust mites off your starborn all revolution sound jugglers
Delinquent fan for brick habitat bob, weave, stick, move fence
and put somewhere in the middle for slick invention
This years brain crop spread spectacular
I ain't mad at cha don't stay mad at the caliber
I twist characters like twist characters
Talley up the alley cat aggression
in this Doug E. Fresh infested mess up bassline lust
An automatic B-boy krylon can't combust circuits
Working these war picked cyphers
with head striker stability and kamakazi chivalry
I alone noble in a warm food feud
Walking ten generations ain't nobody asking for your patience
Who ranned off but only meet to face the fact
that I knew myself and didn't have to ask nobody else

(Talk about labor) Fantastic planet urchin puting work in
Searching for pertinent verse minus the murderous diversions
Apologies won't lore me to the communal sob story
nor would I sacrifice lifestyle to benefit jewerly temperament
This whole Green Goblin webcutter butts up against
crayola daydream landscapes spittin bedlam, Datum
Charge the villagers nickles and nicotine
to watch them fed to undiscreniled crack at the high noon
(We sell popcorn, beer and balloons!)

I got an echelon this gon be the one children bicker over
And start warriors vs. baseball fury element
to glitches mode of century development
I am a star really! The big bang bastard's back
with a one way ticket to Beat Street
This soil is like relevent to human concept
plot the man ratios man learning, I work past the service
I work on what I love, I work the service on my vertince
And I work till this here little flat line closes the curtains

(DJ scratch)
