

# Agent Orange, Bite The Hand That Feeds (Part 1)

i asked a million questions, you looked so surprised  
forgot a million things that i had memorized

yes but i confess, i never dreamed

i had done my best, or so it seemed

[chorus]

take the time to waste a thousand years  
touch the face and wipe away the tears

speak the truth and break the heart that bleeds

stab the back and bite the hand that feeds

think of things that made you cry when you were young  
realize at last your life has just begun

think of lonely places far away

i'm sorry, but i don't know what to say to you

[chorus]

close your eyes - remember me from long ago  
never say a word - no one will ever know  
think of life the way it was before

imagine what the future has in store for you

[chorus]
