

Agnes Carlsson, I believe

heard an angel whisper so softly in my ear I couldnt
hear the words but the message came in loud and clear
Who wrote the book of love calling anyone who knows
The things you do is unexplainable

What can I do

What can I say

Dont say its too late

Oh no

I believe, that you can take this broken heart and give it all the love youve got and take the pain aw

Then Ill be yours forever

I believe, that even if we were far apart youll always be there in my heart

To brighten up my day cause we belong together I believe

Well I dont know what happend

it was just destiny

But now I want you back

lyin right here next to me

Your body glistening

With sweat from love so hot

So are you listenig

To thethings Im talkin bout

What can I do

What can I say

Dont say its too late

Oh no

I believe, that you can take this broken heart and give it all the love youve got and take the pain aw

Then Ill be yours forever

I believe, that even if we were far apart youll always be there in my heart

To brighten up my day cause we belong together I believe

A change is gonna come

if you just let me get through

I think Im in love with you

I think Im in love with you

I believe, that you can take this broken heart and give it all the love youve got and take the pain aw

Then Ill be yours forever

I believe, that even if we were far apart youll always be there in my heart

To brighten up my day cause we belong together I believe
