

# Agnostic Front, Us Against The World

It was us against the world  
We were cast aside,  
Left with no choice  
It was us against the world  
Through this movement we found our voice  
Us against the world  
That's how it was, how it is, it never stops  
Us against the world  
To make a mark and be heard,  
You fight your way to the top

We fought against society  
But where we battled was in these streets  
We fought for identity  
We fought the law while you were asleep  
We fought them all, the real enemies  
But there's more to the story  
It wasn't just about me or being free  
You'll see

We fought to survive  
We fought back  
From the oppression of our own lives  
We fight against what's wrong  
Because, it's us against the world

All the struggle became our might  
Some we lost or got locked up despite  
All the efforts to be free  
One of those people could have been me  
We fought them all, the real enemies, no fantasy  
You think you know us,  
But there's so much more you haven't seen  
So listen up!

We fought to survive  
We fought back  
From the oppression of our own lives  
We fight against what's wrong  
Because, it's us against the world  
We fight to live our lives, we fight back  
To live the way we want and strive  
We fight against what's wrong  
Because, it's us against the world  
Us against the world
