

Agoraphobic Nosebleed, Timelord Two

Agoraphobos

One-dimensional hatross

Alesis Time Machine

Seventh bastard son of the seventh bastard son

Locust abortion technician with deicidal tendencies

I traveled time to kill an unborn Christ

Nocturnus A.D.

Umbilical carefully collected, put into cryo freeze

But I've returned to godless times

Times of understanding and peace

The evidence was everywhere

I had not slain our savior, but the beast

In a world where I never existed

No friends, no family, no ANb

My cargo sold for next to nothing to some Japanese

That years later was rumored to have had programmed

The world's first blast beat
