

# Air, Electronic Performers

We are the synchronizers  
Send messages through time code  
Midi clock rings in my mind  
Machines gave me some freedom  
Synthesizers gave me some wings  
They drop me through twelve bit samplers  
We are electronic performers  
We are electronics

We need to use envelope filters  
To say how we feel  
Riding on magnetic waves  
We search new programs for your pleasure  
I want to patch my soul on your brain  
BPM controls yooour heartbeats  
We are the synchronizers  
We are electronic performers
