

Air, Electronic Performers

We are the synchronizers
Send messages through time code
Midi clock rings in my mind
Machines gave me some freedom
Synthesizers gave me some wings
They drop me through twelve bit samplers
We are electronic performers
We are electronics

We need to use envelope filters
To say how we feel
Riding on magnetic waves
We search new programs for your pleasure
I want to patch my soul on your brain
BPM controls your heartbeats
We are the synchronizers
We are electronic performers
