

Air Supply, I Can't Let Go

I have the ring that needs your finger
I want you always to remember
I want you to be a part of my dreams
I was so lonely here without you
I was so cold just like a statue
Being with you has made me complete

I can feel your loving touch inside me
I can hear you whispering you want to stay close to me

Every day and every night
I never thought your love could feel so right
Every day and through the night
Let me be the one to hold you tight
I can't let go
I can't let go
I can't let to
You're a part of me, don't you know

Would you give me just a lifetime
I'll stand beside you through the years that come and go
Nothing at all could stand in our way

I can feel your answer deep inside me
I can hear you whispering you want to stay close to me

Every day and every night
I never thought your love could feel so right
Every day and through the night
Let me be the one to hold you tight
I can't let go
I can't let go
I can't let to
You're a part of me, don't you know
