

Air Supply, I'll Never Get Enough Of You

All last night we lay in bed making love
I never felt so much before with anyone
Never had to say a word
It was all right there
The warmth inside us flamed and circled everywhere

And if I never have another love
Well at least I had last night
Now I know how the feeling grows
Cause you made me come alive

CHORUS

I'll never get enough, never get enough
Never get enough of you

I'll never get enough, never get enough
Never get enough of you
I only wanna give you more

Now you're gone, I'm all alone just lying here
Waiting for the moment when I'll feel you near
Never asked if you'd come back,
I was too damn proud
I just smile and touched your hair
As you went out

CHORUS
