

Air Supply, My Best Friend

You're here looking like my best friend
Hoping you'll find a way
To tell me you just can't stay

You laughed hard at the world, I know
Now that the seasons show
To tell me, love, your heart will soon mend

We counted everyday
Only to show we needed each other

Who needs a reason to love
When friends just seem to know
They know it

You have lots of dreams, I know
Now it's the close of the show
Let's hope it'll all pass by in the end
So get yourself along
You're my best friend
