

Air Supply, News From Nowhere

(graham russell)

I never saw it happen
I never saw the flame
I never new how much there was
To lose and gain
But when the sun was taken
You never shone so bright
And from a place we'd long forgotten
The blind were given sight
If there's one thing I must do
It's to say I love you to
It's the one thing I'm so sure of

(chorus)

If I hold you now from my point of view
Will you show me how to be close to you
If the dawn should break and you're
Far away
Can you ever know what I need to say
I can see how much I was taking it all
For granted
Among the silent victims
Only the wind would moan

And for a time I felt us touch
The great unknown
For that eternal moment
Oh what a price to pay
With nothing left but all we have
We slowly walked away
If there's one thing I must do
It's to say I love you too
It's the one thing I'm so sure of

(chorus)

So give life to your dreams
For there lies your survival
And cast your heart beyond those
Faded scenes
And I'll bring you through that storm
Yes I'll bring you back

(chorus)

News from nowhere
News from nowhere
News from nowhere...
