

Air Supply, You're Only In Love

I remember an evening so long
How your innocence sang
And the notes made me shiver inside
Like your honesty can
You asked me to please explain some things that seemed new
What was it that felt like pain, and cuts in two

CHORUS

You're only in love, only in love
Where life is new and dreams come true
You're only in love, only in love
To rise and fall and wait as we learn from it all

When conscience pulls you away and your destiny calls
Just follow your heart all the way, you'll never need more
More than the burning light when evening must die
You'll never forget this night, or wonder why

CHORUS

You thought that everything was just a lie
Now, after so much time, don't let the secret pass you by
