

Air Traffic, I Can't Understand

So come on down and let it out
Walk me through the corridors of fear
It's not a dream without a doubt
You try so hard to shut the feelings the out

I lie awake and watch the stars
A cry so far from where we are
And in the haze of shattered light
I break from the chains and drift into the night

Cos I can't understand what's going on
I can't understand what's going on

And now it seems so long ago
We talked for hours and missed the last train home
But are we weightless being blown
Far from the heart and far from all we've known

Cos I can't understand what's going on
I can't understand what's going on

You said our love transcends this life
Now I know it's true
So I cut my hands and I close my eyes
So I can feel it too

Cos I can't understand what's going on
I can't understand what's going on
