

Aj Rafael, No Words

No words can express how much you mean to me mom you've helped me to see
That there's more to this life than just toys shoes and cars

No song can express all the life and the music that you've brought to me
More than any old piano or brand new guitar

Through the dark and the light mom you're fighting the fight and we're here

Mother dearest you've made it so clear that it's all about love in this short life we had

And I know it's been rough but we'll take the storm together momma no one can do it like you

It's been 10 years you've stayed strong but the tears they don't ever go away

He's still here right beside us he'll stay like the wind

You did it yourself without anyones help mom I'm blessed by you mom

And I'm always behind you through thick and through this

Through the dark and the light mom you're winning the fight and we're here

We're still here

Mother dearest you've made it so clear that it's all about love in this short life we had

And I know it's been rough but we'll take the storm together momma no one can do it like you

We've been through so much no one or nothing could touch what we have as a family holding on I

Still here

Mother dearest you've made it so clear that it's all about love in this short life we had

And I know it's been rough but we'll take the storm together momma no one can do it like you

Mother dearest you've made it so clear that it's all about love in this short life we had

And I know it's been rough but we'll take the storm together momma no one can do it like you

Momma no one, can do it like you (x2)

So much to say but words get in the way so I'll just thank you and just love you and mom I'm proud
