This song I sing is made in honour of my baby son,  
We're happy, Ewan, that to Planet Earth at last you've come.  
You're welcome here among the Celts and into every land  
And may good fortune follow you as you become a man.

The love I bear for the girl whose hair is like volcano flame  
And sea blue eyes, will keep you safe and free from any harm.  
No power on earth can hold you down or keep you from the air  
Or let the small and petty minds divert you from your way.  
I see your small face bathed in radiance from the setting sun,  
Its warmth will keep away the chill long after spring has gone.  
The fountain sign where you were born and under which you're nursed  
Is gushing forth its dreams of joy and you shall never thirst.

The love I bear for the girl whose hair is like volcano flame  
And sea blue eyes, will keep you safe and free from any harm.  
An easy life that's free from strife is more than I can give  
For you must fight to win the right to speak as you would live.

This song I sing is made in honour of my baby son,  
We're happy, Ewan, that to Planet Earth at last you've come.  
You're welcome here among the Celts and into every land  
And may good fortune follow you as you become a man.

The love I bear for the girl whose hair is like volcano flame  
And sea blue eyes, will keep you safe and free from any harm.  
And if the worst should come to pass and this round world should end,  
I know another Earth we'll find and start the song again.
