

# Alestorm, Set Sail And Conquer

We set sail at first light  
Questing for steel with power and might  
For countless days we ride the waves  
The battle lies ahead  
Our coming they do dread  
We raise the black flag  
And ready our attack

Fire the cannons, storm the walls  
We will see this city fall  
Show no mercy in the fight  
The sky will burn with blood this night

Set Sail and conquer - On a quest to distant lands  
Set Sail and conquer - Destiny is in our hands  
To the heart of battle ride - The gods are on our side  
We'll sail and conquer 'til we die

A reign of blood and slaughter  
We show our foes no quarter  
Taking their lives and watching them die  
We leave our fears behind  
Only treasure on our minds  
For tonight we raise a hail  
In death or victory

Fire the cannons, storm the walls  
We will see this city fall  
Show no mercy in the fight  
The sky will burn with blood this night

Set Sail and conquer - On a quest to distant lands  
Set Sail and conquer - Destiny is in our hands  
To the heart of battle ride - The gods are on our side  
We'll sail and conquer 'til we die
