

Alexz Johnson, Over-rated

You think it's cool, just cuz they're telling you
You gotta have it, then you'll never miss it at all
You need the thrill, just cos it's killing you
You're so close, so don't take it too far

(Chorus)

Where there's smoke you'll find a mirror

It's over-rated

I've watched it fade

So please don't give in

Don't forget what you believe in

It's over-rated

It's not worth chasing

Don't you know that

You'll love to love and then you'll hate it

Love and lost and everything between

It's perfect, it's poison that made me fall

You want it bad

Don't want it to skip away

It's too fast

Gonna drag you down

Chorus

Coming close now, not any clearer

With every breath you're going deeper

But I will pull you back to me
