

Alice Ripley, Seconds And Years

A little loss of memory is normal
And helpful in forgetting all her fears
I couldn't give a flying fuck what's normal
We haven't had a normal day in years
Diana, are things becoming clearer with the treatment?
Well, yes
Is life less cloudy than it was before
Yes
Do you still feel your head is filled with concrete?
No, and you're not a scary rock star anymore
Okay great, what about her memory?
