Alicia Bridges, We Are One

You sleep just like a baby After you've been holdin' me With tenderness and with love And as I watch you sleepin' My heart builds up with feelings That make me cry the tears of love We are one You and me baby In body and soul We are one We take care of our special love And when the mornin¹ comes And in the face of the sun We'll still be together We are one We are one As I watch you sleepin' I wonder how I'd ever live without you dear Oh, without your love My fingers trace your brow And then I feel a tingle deep inside, takin' a high We were makin' love, oh love We are one You and me baby In body and soul We are one We take care of our special love And when the mornin' comes And in the face of the sun We'll still be together We are one We are one And when the mornin' comes And in the face of the sun We'll still be together We are one We are one
