

# All About Eve, Phased

After laughing at the stars the time  
arrives to coincide with all the chaos and  
the sparks of when two worlds collide

And it's been hours now ; feels like  
days. We've been hours now, in these waves.

We've been phased We've been  
alchemized...Melted, liquified and dried  
and left to crystallize.

And it's been hours now ; feels like  
days. We've been hours now in these waves  
We've been phased...
