

# All, Just Perfect

It has to be time to take you in my arms  
And show you how I feel  
It has to be here, it has to be now  
Or this one won't be real  
It has to be time to leave it all behind  
What a perfect time for me to make you mine  
I know I can make everything just perfect  
I'm the only boy who can make you see  
That you're the only girl in the world for me  
I know I can make everything just perfect  
I know I can make everything just perfect  
Cause when I'm with you then everything's just perfect  
You wouldn't have to take anything  
Except me with you wherever you go  
I know I can make everything just perfect  
So throw away the weed that you don't need  
Show me all the things that I've never seen  
I know I can make everything just perfect  
I know I can make everything just perfect  
Cause when I'm with you then everything's just perfect  
It's the perfect time to leave it all behind  
And put your life in place  
Because I can replace all the drugs you take  
With the smile on my face  
So it's yes if I can really trust you  
And it's no if I can only lust you  
I know I can make everything just perfect  
You can do no wrong no matter what I say  
I can only make everything just perfect  
I know I can make everything just perfect  
When I see you again
