

All, Right

Today she made the pain stop
With the sound of her voice
I've learned to live with doubt
And I've learned to live without
But not by choice
I've had enough sad memories
To last me all my life
I've learned to live with doubt
And I've learned to live without
But not this time
I was walking wounded
I said, "Never again"
She makes it easy
She's my best friend, my best friend
She's right
I look in her eyes
I like what I find
I've learned to live with doubt
And I've learned to live without
But not this time
We speak the same anguish
When we make love she smiles
I've learned to live with doubt
And I've learned to live without
But not this time
I was walking wounded
I said, "Never again"
She makes it so easy
She's my best friend, my best friend
She's right
I was walking wounded
I said, "Never again"
She makes me happy
To be her best friend
She says, she's my best friend
She's right
