## All Star United, International Anthem

Listenin' to this I'm transcending English Something's bigger Than the national hymn If you're thick, too thin Green, blue or pinkish Hum together with a cellophane skin A holy karaoke, prayer in stereo Here it comes, here's to You An international anthem is overdue Here's to You To the kings and queens And all the president's men It doesn't matter if you're strong King Kong Lose the things Between yourself and Heaven And then, when you're ready You can hum along A holy karaoke, prayer in stereo From down here below Here it comes, here's to You An international anthem is overdue Here's to You From down to here below In gratitude from Coco to Moscow We hope you're pleased With these rhyme schemes And musical score like never before Here it comes, here's to You An international anthem is overdue Here it comes, here's to You An international anthem is overdue Here's to You
