

ALO, Lady Loop

I hear you talkin' out the right side
I hear you talkin' out the left side
I hear you talk about the way things ought to be

I gotta figure out your angle
I got the feelin' that you're no angel
Your preachin' style's not foolin' me

Cause when it all falls down
Fallin' all around
Don't expect to protect your reputation

Cause when it all falls down
Fallin' all around
I'll be there to except your resignation

I hear you talkin' out the right side
I hear you talkin' out the left side
I hear you talk about the way things ought to be

I gotta figure out your angle
I got the feelin' that you're no angel
Your preachin' style's not foolin' me

Cause when it all falls down
Fallin' all around
Don't expect to protect your reputation

When it all falls down
Fallin' all around
I'll be there to except your resignation

I hear you talkin' out the right side
I hear you talkin' out the left side
I hear you talk about the way things ought to be

I gotta figure out your angle
I got the feelin' that you're no angel
Your preachin' style's not foolin' me
