Altar, Ode

Let the feast begin Come and sing with me Raise the glasses high To our victory This is the perfect day I see that we're complete Let us celebrate Answer lust and greed We share the same mentality The order of damned souls Enjoy our mass brutality Wé know what's our goal Tonight we do not care About the ones who didn't know About the ones who are not here About the fools who live below Indulge our glory Proudly we stand Indulgé our glory Of the left hand Now gather around To dispose our sins On ceremonial ground Let the storm being This song is an ode To twenty years pleasure To where I belong That twenty years of metal Made me strong
