

Alter Bridge, Season Of Promise

We gather to foster all the knowledge we have found
Passed down from a generation, long forgotten now

Like dust from the stars
Scattered from afar

We wait for the harvest
In the season of promise
That was sown through the ages
That brings us to see
Everything that was started
By the dearly departed
May it live on forever
For the future to be

To bring about our destiny

The wisdom of all we are and all we're meant to see
A truth that can get us by if only we believe
It's never that far

We wait for the harvest
In the season of promise
That was sown through the ages
That may bring us to see
Everything that was started
By the dearly departed
May it live on forever
For the future to be

To bring about our destiny

Someday
We'll fade to nothing
A cruel change
That we can't ignore
We'll be okay
As long as there is something
We can leave behind
Never lose faith
You know we still have time
There's still a promise yet to find

We wait for the harvest
In the season of promise
That was sown through the ages
That may bring us to see
Everything that was started
By the dearly departed
May it live on forever
For the future to be
