

Amanda Marshall, Never Said Goodbye

I got a friend
He lives down in old Albuquerque
We used to watch the sun coming up together
But he was hungry then
And he got restless
I heard he took a wife
I think her name is Heather
CHORUS

All of a sudden I'm driving in the rain
With the Santa Fe horizon
Calling out my name
Should've done it sooner
Now I know it's time
'Cause we said a lot of things baby
But we never said goodbye

We were a team
We were the best of friends
We had a world where no one else could find us
The summer passed
September came too soon
And suddenly that world was all behind us
CHORUS 2

Driving through the desert
With nothing on my mind
But the thought of catching up
With a ghost I left behind
Don't know what I'll do
But I know I've got to try
'Cause we said a lot of things baby
But we never said goodbye

I drove 1000 miles
Chasing a memory
But all the pieces of what used to be have scattered
And all the little things
That used to mean so much
I look around me now and see that they don't matter
CHORUS 3

All of a sudden I'm driving home again
'Cause sometimes goodbye is better left unsaid
The Santa Fe horizon will know the reason why
I said a lot of things to you
But I never said goodbye
