

# Amaranthe, Trinity

(Resistance is futile)

Like the sun comes crushing down  
You will set the world on fire

Deep down you got to know why  
We prepare for war, it's vengeance or sacrifice

Incapability to hide  
From the predictable desire

Time's up, all in  
I will rise to top

Going to crush us, put us to sleep, it's lifting us up  
As our instincts come alive  
Got to never give in as we're falling into the sky

This time gonna let us all shine  
One makes three in this chemistry

Trinity is the key to feel alive  
It's just a shattered world, there right before your eyes  
You see the will to fight as we live and die  
I see the light, it's trinity, unite

As I set the sky alight  
An inescapable empire

Heads up, you got to realise  
That glow you see forever will haunt us

As we break the chains of might  
In dependence of the fire

Give up this ground sterilized for all time

Going to crush us, put us to sleep, it's lifting us up  
As our instincts come alive  
Got to never give in as we're falling into the sky

This time gonna let us all shine  
One makes three in this chemistry

Trinity is the key to feel alive  
It's just a shattered world, there right before your eyes  
You see the will to fight as we live and die  
I see the light, it's trinity, unite

Going to crush us, put us to sleep, it's lifting us up  
As our instincts come alive  
Got to never give in as we're falling into the sky

This time gonna let us all shine  
One makes three in this chemistry

Trinity is the key to feel alive  
It's just a shattered world, there right before your eyes  
You see the will to fight as we live and die  
I see the light, it's trinity, unite
