

# Amen, Private

It goes on too long  
Nothing goes on too long

Well I told the truth when I fucked the lives [???)  
Drugged down the city and burnt house of lies [???)  
They suck it up  
Suck it in  
Sink the needle and let's begin  
??? than they're used to

You cannot wait another day  
So let the needle hit the tray

In your private garden  
In your private fear  
In your private garden

(Nothing goes on too long)

I pick around for 40 days and nights  
The cities blaze and wasted radiate the nights [???)  
They suck 'em up  
They shoot 'em in  
They feel the needle that lets it in  
More drugs that kill than they're used to

You cannot wait another day  
So let the needle hit the tray

In your private garden  
It's your private fear  
In your private garden  
Someone's gotta pay that fear

In your private garden  
In your private fear  
And if it comes down to  
Someone's gotta pay that fear

In your private garden  
It's your private fear  
???)
