Found on perspective.

Nobody can tell me i didn't try anything
I didn't know what to do to get over you
I tried magic and potions but i could not shake you loose
From my dreams, strange as it seems

It's like you never left at all
I guess i just can't forget you
It's like you never left at all
Somethin' inside me just won't let you go

Took a vacation for a month, maybe more
Made some new friends in places i've never been
But recuperation hasn't even yet begun
I'm still reachin' over for you when the morning comes

It's like you never left at all
I guess i just can't forget you
It's like you never left at all
Somethin' inside me just won't let you go

You're only illusion but you're standin' in my way
And you've got your life, it's a new life
But mine can't seem to change

It's like you never left at all
I guess i just can't forget you
It's like you never left at all
Somethin' inside me just won't let you go
Somethin' inside me just won't let you go
Somethin' inside me just won't let you go
