American Hi-Fi, Rise

I dont know what I can take Can you feel the pressure break Ive been getting by on nothing How long so long Feeling like I lost my vision Transmission full of dead ambition Kinda sorta gotta get it together I cant wait forever

Rise out of the atmosphere I gotta disappear I gotta get out of here You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me

I could never be that clever Even though its now or never Counting down the seconds till it blows 4 3 2 1 Disappear without a trace Could I be in outer space Staring at the sun till I get how high so high

Rise out of the atmosphere I gotta disappear I gotta get out of here You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me

Did I break down Can we slow down I wanna get out I dont wanna be so bored

Rise out of the atmosphere I gotta disappear I gotta get out of here You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me

You got the best of me [x8]
