

Amerie, Come With Me

[spoken]

Look, you don't have to take this
You can come with me

[Chorus]

So hard to believe she left you alone all alone
I know babe you can come with me though
So hard to be strong cause she left you alone all alone
I know babe you can come with me though
I know you're alone you can come with me though
I know you feel pain you can come with me though
I know you feel hurt you can come with me though
It wouldn't be the same if you come with me though

I just couldn't believe, believe it babe
That she would go and treat you that way
Especially after all the craziness you took
It just ain't necessary
I can feel the tears that you're crying tonight
'cause I know what love is supposed to be like
Every little hug and kiss that she put aside
Baby if you want to I can make it right

[Chorus]

If I could ever find the words to tell you babe
How I felt so deep inside
Didn't want to be too bold, didn't want to hate on your girl but now I
Can let you know that its wrong what you're going through
You deserve the same love I see in you
Given back a hundred fold baby I would do
Show you love that you've never seen, never knew

[Chorus]

It won't be the same
If you come with me [4x]
You won't feel no pain
If you come with me [4x]

[Chorus 3x]
