

Amie Comeaux, Who's She To You

Well I've been watchin' you
And you've been watchin' her
You looked like you saw a ghost
The moment she walked in
I knew there was someone else
Before I came along
I've often wondered who she was
And was she really gone

Who's she to you
And where does that leave me
Is she still in your heart
Or just a memory
If she says hello
Will you tell me goodbye
Who's she to you
And darlin' who am I

The looks you're giving her
Are doin' things to me

You say there's no reason at all
For my jealousy
As long as there's a little smoke
A fire's never cold
If history repeats itself
What does our future hold

Who's she to you
And where does that leave me
Is she still in your heart
Or just a memory
If she says hello
Will you tell me goodbye
Who's she to you
And darlin' who am I

If she says hello
Will you tell me goodbye
Who's she to you
And darlin' who am I
