## And Oceans, Odious & Devious

Odious & Devious
The black iris devours pictures in silence
The image of devils light my consonance
The Lef consolation

The I of consolation
The eye of consolidation
Graves are the garden trees
Dead all flowers and so are we
Silent moves of the summer flies

Engraved clouds below divided skies

Insect influx, the scent of the dogs

My sweet flower, and insect on the cross

[Chorus:]

Darkly wise odour of the evil tongues

Odious and devious

I despise Jinx of eden

Black paradise

Lips of times of secret Murmur evil sprouts

Purges the redeemer

Purge

The angel of voices

Injected by silence

Last breath of nails

Needles and icons

The eye of consolidation

The I of consolation

Taste the lips of ancient pleasures

Eat the fruit of darkly treasures

[Chorus]
