

...And You Will Know Us By The Trail Of Dead, C

Well the mood settled down
Once the movie hit town
You know all the movies I've seen
You never did understand
How I watched all of them
I can't figure how you never did

And the moon is so gold
That it conquers the soul
Like that very first moment we kissed
But you never will go far
In daddy's Japanese car
Just thinking of all the things that we've missed

...What good are promises
If nobody honors them?

And so we never ask 'why?'
Don't say anything nice
And don't talk if we meet on the field
Because I want you to know
That I let it all go
Even if you never did.
