

# Anders Johansson, She Loves Me

She's got a smile that could light up the sky  
And when she's looking at me  
I see my future in a beautiful eyes  
It's almost hard to breath

When I hold her in my arms  
I know I'm right at home  
When it's cold  
She keeps me warm  
It feels so good to know  
She loves me  
Just as I am  
She always understand  
I know whatever might be  
She loves me  
Oooh she loves me

I wanna wake up each day of my life  
And find her there by my side  
Cause without her there's no reason to live  
There's no one else I see

When I hold her in my arms  
I know I'm right at home  
When it's cold  
She keeps me warm  
And every day she shows she loves me  
Just as I am  
She always understand  
I know whatever might be  
She loves me

I wanna give her the world but it's not ---  
I wanna give her my gold and it's all because  
She loves me  
Just as I am  
She always (she always understand)  
I know whatever (whatever might be)  
She loves me  
Just as I am  
She always understand  
I know whatever might be  
She loves me

Just as I am  
She loves me  
She loves me  
She loves me
