

# Andi Deris, We're Riding The Light

Unbounded colours are drafting ahead  
Lighten a future which we never had  
We are the troopers  
Riding through space until we die  
Riding through space until we die

We're riding the light  
Riding the light  
We are the damned of the holy reich  
We're riding...

First came the liars  
The there was hate  
The came the fire  
And nearly too late  
Were sent the troopers  
Into the space of human race

We're riding the light  
Riding the light  
We are the damned of the holy reich  
Where is the one?  
Where is the one  
Leading us home where it's all begun?  
We're riding...

We are the troopers  
Deep in your minds  
We are the troopers  
We are the spies

In a dreams without end  
It's a dream without end  
We are the damned of the holy reich  
Where is the one?  
Where is the one?  
Leading us home where it's all begun?  
We're riding...
