

Andrew De Torres, I Can't Name You

Some things been eating me up
It's four in the morning my eyes should be shut
Is it cold were your sleeping
Do you keep on wishing
That someday i might just show up
Remember the plans that we made
About getting married and where we would stay
Do you still hope we'd end up that way
Cuz i know i've been praying each day
Let me whisk you away from your doubts and denial
Oh i know that you've heard this before
From the gentel man whos struggling because of the miles
Who's begging to make him your own
Some things been causing this pain
I know it's not real it just feels that way
How did things dramatically change
Wish things would of just stayed the same
Don't you dare wake me up
I dont want to wake up without you next to me
Don't you dare wake me up
Let me whisk you away from your doubt and denial
Oh i know that you've heard this before
From the gentel man whos struggling because of the miles
Who's begging to make him your own
Let me whisk you away from your doubts and denial
Oh i know that you've heard this before
From the gentel man whos struggling because fo the miles
Who's begging to make him your own
