

# Andy Summers, Hold Me

Sleeping I grow cold  
somewhere dreams unfold  
there's a light outside  
shining down  
through my window  
'cross this town

Evening  
stars will be  
from my window  
I can see  
through the light  
love came in

Light outside light outside

When you  
hold me

I will know  
heart beats  
overflow

And the light outside  
falls on me  
from my window  
I can see  
through the light  
love came in

Sleeping I grow cold  
somewhere dreams unfold  
there's a light outside  
shining down  
through my window  
'cross this town
