

# Angel, Believe In Angels

You say we're all the same  
And girls just like to tease  
We like to play the game  
And keep you down on your knees

You got a broken heart  
So now we're all to blame  
Boy she's giving girls a bad name

You're searching the skies, for some kind of sign  
But you say  
A love like that could never come true

What you're longing to find, you had it all the time  
What's it gonna take to make you see it too ooh

[Chorus]  
How can you say  
You don't believe in angels  
Cuz I'm real and I'm  
Right here in front of you  
How can you tell me  
That your hearts still waiting?  
When I'll give you a love  
Like you never knew  
How can you feel it and still not believe it  
Everything you say you need (whoa)  
How can you say you don't believe in angels  
Do you believe in me

You used to dance with me  
But it's not like before  
We feel the chemistry  
Now could it be something more

Maybe I'm what you want  
What you've been praying for  
Heaven sent me to your dance floor

You're searching the skies, for some kind of sign  
But you say  
A love like that could never come true

What you're longing to find, you had it all the time  
What's it gonna take to make you see it too ooh

[Repeat Chorus x1]

I can't appear in your sky  
I don't have wings, I don't know how to fly  
But my love can take you higher  
I could set your heart on fire

How can you say  
You don't believe in angels?  
How can you tell me  
That your hearts still waiting?  
whoa whoa whoa whoa whoa whoa whoa

How can you say  
You don't believe in angels?  
How can you tell me  
That your hearts still waiting?  
How can you feel it and still not believe it?

Everything you say you need (whoa)  
How can you say you don't believe in angels?  
Do you believe in me?

How can you say  
You don't believe in angels?  
How can you tell me  
That your hearts still waiting?  
How can you feel it and still not believe it?  
Everything you say you need (whoa)  
How can you say you don't believe in angels?  
Do you believe in Me
