

# Angel Dust, Unreal Soul

Starlight shines in another world  
Spent my life in a dark dismay  
It starts with you for what it's worth  
Can't speak your name, or I go insane

In another world - back to my soul  
I know there's nothing here, oh yeah

Seems I'm back in a loveless world  
Can't understand what it's worth  
Step outside the lifeless game  
I've never understood what it says

In the f\*\*king world blacks out my soul  
I know there's nothing real - oh

There's nobody else who gives this to me  
'Cause whoever said my soul would heal?  
There's no one who shares in my whole misery  
For who will say my soul is real?

I step outside this f\*\*king cage  
New forms of life cry out and rage  
I feel flying back the loveless fear  
To check and see my soul is real

[repeat bridge one]

[repeat chorus]

[repeat bridge one]

[repeat chorus]

There's no one who shares in this whole mystery  
'Cause whoever said my soul was real?  
I laugh out but now of the whole misery  
'Cause who will save my soul, it's real
